

# Unlock the value in your research

Limeglass Research Atomisation technology eliminates information overload and allows you to focus on the relevant paragraphs of your financial research.

Next-generation Rich NLP APIs and portal can empower your sales, research and strategy teams to optimise your existing research whilst enhancing your clients' reading experience.

For the first time, users can explore granular insights for all asset classes and macro themes across your research at paragraph-level without having to open each document one at a time.

**Please feel free to get in touch** to find out how to transform the liability of research overload into the asset it was designed to be...

# Innovation - Maximise the value of your research with:

## Research Atomisation

Instantly surface paragraphs in context on any topic from the entire research library

**one click away from relevant paragraphs in multiple documents**

## More personalisation

Respond to the needs of your users in near real-time to produce research that you know will deliver value to your clients

**tailor your output to the topics your clients are interested in**

## Incisive topic search

Move beyond traditional search functions and discover information by theme and topic area through proprietary rich natural language processing

**understand topics faster, and in more detail**

## Top market themes

With the answers you need on any topic at your fingertips, ensure your clients receive personalised emails

**strengthen the client relationship**

## Focused relevancy

Stop research getting lost in email inboxes. Harness your newfound insights to provide clients with the most relevant research for their interests in a way that suits them best

**integrate with your existing delivery solution or simply white-label Limeglass's Portal**

## Rich NLP APIs

Integrate APIs into your platform to access granular thematic tags across all asset classes and macro topics

**easy onboarding with Rest APIs**

## Granular coverage metrics

Harness the easily navigable knowledge base to surface paragraphs however granular

**find what you are looking for and more**

## Better statistics

Discover what themes are being read at a granular level and by whom

**concentrate resources on the insights clients are reading**

## Improved reading experience

Our expertly curated taxonomy allows you to uncover key insights by opening up synonyms and combinations of terms

**taking you far beyond regular search engines**

## Increased efficiency

Distribute exactly what your clients want to read to answer their specific questions

**demonstrate that your research is integral to their success**

## Innovation

Profit from powerful artificial intelligence (AI) and rich Natural Language Processing (NLP), augmented by human editors

**leverage Limeglass's combined human and artificial intelligence to create new, innovative products**
